

I subscribe to xm satellite radio and I am upset with the national association of broadcasters petition to limit programing of satellite radio. I don't think that they have the right to do so. The reason I subscribed in the first place is that I was not happy with the programing that regular radio was providing. I respectfully urge you to reject the NAB's petition 04-160 and support satellite radio's ability to provide the service we the public deserve. thank you.
